

## What is INFERMENTAL (IF)

IF is an international Periodicum on Videotapes with innovating aspects for art and communication.

IF publishes works within a range of 10 minutes:

- 1.) Original works produced on video specially for IF
- 2.) Documentaries about innovating visual events
- 3.) Films which don't lose their character when copied on video in order to give information about their existence
- 4.) Parts of a film (trailer) for publicity of the filmmakers

Planning for distribution:

- 1) Hire
- 2) Selling the copies
- 3) lending to cultural institutions who have not got much money on a non-profit base

We are thinking of meetings of the filmmakers involved f.ex. after a presentation on a filmfestival having exchanges about organisation and development of IF
